D1	Queensland Rail 305 Edward Street, Brisbane Qld 4001 13 16 17 railsafetyeducation@qr.com.au www.queenslandrail.com.au	Rail Safety Education At Queensland Rail, we are dedicated to connecting communities and delivering world-class service. Safety is at the heart of everything we do. Safety comes first. Always. To uphold this commitment, our Community Education team deliver the Railsmart program, a free, statewide initiative designed to promote rail safety and public transport awareness. This program delivers essential safety education to kindergartens, schools, alternative learning centres, and youth and community groups across Queensland.
D2	Model Electronic Railway Group SEQ	Model Electronic Railway Group (MERG) MERG (an international group, based in the UK, with a local chapter in South East Queensland) is a group of railway modellers who meet monthly to exchange ideas on how to use modern day electronics to drive their trains, control their layout and add interest such as sound. We have a wide range of people in our group, people with little or no knowledge of electronics, cabling etc through to electrical and electronic engineers. We meet monthly to attend presentations and workshop where we build electronic kits and help each other learn about electronics. If you are interested, please contact Stephen Sherwood 0428 339 521 or by email: sequeensland@merg.org.uk or find out more go to www.merg.org.uk or email Stephen Sherwood at sequeensland@merg.org.uk

D4	<p>Lancashire & Yorkshire Railway Society</p> <p>Mr Peter Hunt 120 Ganbenang Road, Lowther NSW 2790</p> <p>0433 808 468</p> <p>www.lyrs.org.uk/the-society/</p>	<p>The Lancashire & Yorkshire Railway was one of the busiest and most complex of the pre-grouping of the British Railways. It ranked fifth in overall size and stretched across England from Liverpool and Fleetwood in the west to Goole in the east, and served a greater population per mile of route than other major lines. With much of its mileage in hilly terrain civil engineering works were massive with numerous tunnels, bridges, viaducts and some fearsome gradients. The L&Y was known as the "Business Line" and was very epitome of the area through which it ran serving the great textile towns, collieries and major Irish and North Sea Ports. Its Passengers Services ranged from smartly timed expresses to the intense and complex local workings around Liverpool and Manchester.</p> <p>Through a team of energetic and competent managers the railway was at the forefront of engineering development. It was an early user of the Belpaire firebox and the first to introduce superheated steam. Electrification of local services started in 1904 and it operated the largest railway owned shipping fleet in the country. The locomotives in their smart black paint with red and white lining and oval brass number plates hauled trains of lake & tan liveried carriages and long freight trains over the difficult Pennine Terrain.</p>

D8	<p>Scratch Building Queensland Railway Wooden Wagons</p> <p>0468 823 050 grnut@hotmail.com 26 Dampier Drive, Andergrove 4740</p>	<p>The steam era of QR is attractive because of the large range of classes of wooden wagons. Even within classes, there were large variations. To capture that range especially of one offs, scratchbuilding is a great approach to give individuality to each wagon. What better way to represent wooden wagons than to use actual wooden strips and sheets. Building in wood presents some challenges. Come and discuss possible ways to overcome these and achieve a satisfying result.</p>

L17a	Cylo - All Gauge Model Railway Club	Cylo is a N Gauge Layout with 2 main lines and marshalling yard, plus a golf course.
L18	South Pine - Railway Modellers Club of Queensland 20 Terrence Road Brendale 0418 793 372 trevor.kerr@live.com.au www.rmccq.org.au	South pine is a modular layout built by the Railway Modellers Club of Queensland to cater for the exhibition needs of our members. The layout is designed to run DCC locomotives, and while it has a basic Australian look and feel trains from all around the world, in particular the US and Europe, can also be seen. It is based on an industrial area with passing loops, engine facilities and some local industries. This allows trains to be always on display with continuous operation on the mainline or shunting in a siding or loco area. Some of the industries or commercial premises displayed are strong supporters of our club. The layout is transported in a purposely designed trailer to ensure protection and only needs one member to transport. For details of our club, visit www.rmccq.org.au . Visitors are always welcome.
L19	PINE RIVERS Railway Modellers Club of Queensland 20 Terrence Road Brendale www.rmccq.org.au rmccq.org.au@gmail.com 0412 884 345	PINE RIVERS is an N scale modular layout loosely based on the NTRAK standards. This layout, by the Railway Modeller's Club of Queensland Inc, is always being modified and this year includes a Point to Point Tourist railway, fully controlled automatically with a DCC shuttle from the UK. The visiting Circus is still in town. Listen for the music coming from the Big Top. The Sporting Complex for Tennis, Swimming and Basketball has been upgraded. A fully DCC controlled Industrial area has been developed to help support the existing Wheat Loading Silos and Light Industries with rail services. Points in this area are activated by slow motion servos controlled by DCC throttles. The Housing Estate continues to grow and is getting closer to occupation. All this surrounds the Canyon River Scene with its Township. Due to heavy rain, the rapids are running with white water crashing over the rocky river bed. The Town Council has upgraded security by installing street lights to the township.
L20	Walloon - Logan District Model Railway Club 76 Springlands Drive, Springwood Qld 4127 0434 822 731 www.ldmrc.com secretary@ldmrc.com	Walloon station is one of the original stations on the line from Ipswich to Biggs Camp (now Grandchester) and was opened in 1865. Since this time the line has been extended out west, the layout is HON3.5 and is set in the period of 1960 - 1980.

Number	Exhibitors Name	Description
L21	Country - Logan District Model Railway Club 76 Springlands Drive, Springwood Qld 4127 0434 822 731 www.ldmrc.com secretary@ldmrc.com	A theme / place of the layout is to be made to accommodate Australian, American/ Canadian, and British Railway trains. At time of running of trains on the layout, only one type of prototypical train is to run per session. A session may be a morning or afternoon or day. e.g. American in the morning and English in the afternoon to keep the prototypical look.
L22	High Country - Logan District Model Railway Club 76 Springlands Drive, Springwood Qld 4127 0434 822 731 ldmrc.com secretary@ldmrc.com	An individual constructed layout based on a "T" track system, each unit has been constructed separately to a general style, each unit is interchangeable with each other. The scenery is based on the mountainous region of Banff in Canada.
L23	"KGP Junction Cannon Hill Model Railway Club C\ - Cannon Hill YMCA corner Lang & Princess Streets Cannon Hill 4170. 0426 148 670 ballp36@yahoo.com	KGP Junction is a freelance Layout, with American & Australian theme
